In leading and operating enterprises in a global context, the global manager is constantly faced with the challenge of how to optimize the needs for increasing specialization, stronger integration within departments and better connections across departments to achieve alignment with stakeholders.

This course is about how to achieve alignment amongst stakeholders of enterprises operating in a global context. This entails the creation of an integrative perspective to understanding global management, both at the enterprise level and the executive level. This is of particular importance for global managers aspiring to become CEOs.

At the enterprise level, the focus will be on how synergies amongst enterprise governance, enterprise well-being and enterprise sustainability can be generated to help enterprises get to the bottom line and beyond.

At the executive level, under the themes of connecting to win, differentiating to lead and integrating to serve, the course will equip students with theories, models, and tools that can help global managers to appraise and reflect upon the roles they should play, the leadership styles they should adopt, and the workplace environment they should shape that would work for themselves and their stakeholders.

The individual and group work should polish students' analytical and communication skills. This will help them navigate more comfortably as leaders interacting with stakeholders.

COURSE OBJECTIVES

1. To learn and apply general knowledge in humanities studies and scientific knowledge in empirical studies to global management contexts.
2. To learn recent important issues of global management: with emphasis on practical implications.
3. To learn and apply the fundamental management frameworks, theories, and models of modern organizational studies.
4. To develop the professional competencies of becoming leaders in enterprises operating in a global context.
5. To build communication skills required to be an effective leader in a global arena.

PROGRAMME LEARNING OUTCOMES

PLO1: Acquisition and internalization of knowledge to create an integrative perspective on global management.

PLO2: Application and integration of knowledge to solve problems to be encountered as global management executive.

PLO3: Inculcating professionalism as an organizational leader.

PLO4: Developing global outlook and mastering communication skills.

COURSE POLICY (e.g. plagiarism, academic honesty, attendance, etc.)

The University Regulations on academic dishonesty will be strictly enforced. Please check the University Statement on plagiarism on <http://www.hku.hk/plagiarism/>.

Cheating or plagiarism of any kind would result in an automatic F grade for the course plus strict enforcement of all Faculty and/or University regulations regarding such behavior. Incident(s) of academic dishonesty will NOT be tolerated.

Academic dishonesty is a behavior in which a deliberately fraudulent misrepresentation is employed in an attempt to gain undeserved intellectual credit, either for oneself or for another. It includes, but is not necessarily limited to, the following types of cases:

- a. Plagiarism - The representation of someone else's ideas as if they are one's own. Where the arguments, data, designs, etc., of someone else are being used in a paper, report, oral presentation, or similar academic project, this fact must be made explicitly clear by citing the appropriate references. The references must fully indicate the extent to which any parts of the project are not one's own work. Paraphrasing of someone else's ideas is still using someone else's ideas, and must be acknowledged.
- b. Unauthorized Collaboration on Out-of-Class Projects - The representation of work as solely one's own when in fact it is the result of a joint effort.
- c. Cheating on In-Class Exams - The covert gathering of information from other students, the use of unauthorized notes, unauthorized aids, etc.
- d. Unauthorized Advance Access to an Exam - The representation of materials prepared at leisure, as a result of unauthorized advance access (however obtained), as if it were prepared under the rigors of the exam setting. This misrepresentation is dishonest in itself even if there are not compounding factors, such as unauthorized uses of books or notes.
