COURSE DESCRIPTION	
Capitalism has spread across the world as a driving force for economic growth and human prosperity, but it has also created a myriad of social ills, such as environmental crisis, social inequality, and political unrest. Managerial practices are both a cause for and a solution to these global challenges. We first introduce the intellectual tools with which we can understand how individuals and organizations are structured within macro societal factors and then use recent and historical managerial exemplars to inspire actions and ideas which have the potential to transform global capitalism.	
COURSE OBJECTIVES	
One of the main foci of this course is to understand how individuals, organizations, and societies are being managed by global market forces, especially in the past decades. The other focus of this course is to introduce students to managerial inventions that aim to transform global capitalism for the better. We will draw upon recent and historical exemplars to inspire students to become future leaders who can innovate and sustain better management practices in global organizations.

COURSE POLICY (e.g. plagiarism, academic honesty, attendance, etc.)
Cheating or plagiarism of any kind would result in an automatic F grade for the course plus strict enforcement of all Faculty and/or University regulations regarding such behavior. Incident(s) of academic dishonesty will NOT be tolerated. Academic dishonesty is a behavior in which a deliberately fraudulent misrepresentation is employed in an attempt to gain undeserved intellectual credit, either for oneself or for another. It includes, but is not necessarily limited to, the following types of cases: a. Plagiarism - The representation of someone else's ideas as if they are one's own. Where the arguments, data, designs, etc., of someone else are being used in a paper, report, oral presentation, or similar academic project, this fact must be made explicitly clear by citing the appropriate references. The references must fully indicate the extent to which any parts of the project are not one's own work. Paraphrasing of someone else's ideas is still using someone else's ideas, and must be acknowledged. b. Unauthorized Collaboration on Out-of-Class Projects - The representation of work as solely one's own when in fact it is the result of a joint effort.
