

**THE UNIVERSITY OF HONG KONG
FACULTY OF BUSINESS AND ECONOMICS**

MSBA7016 Supply Chain and Logistics Management

GENERAL INFORMATION
Instructor: Prof. Benjamin Yen Email: benyen@hku.hk Office: KKL 307 Phone: +852-3917-1681 Consultation times: Thursday 15:00-17:00 (or you can always contact me by email to or talk to me during lecture tea breaks to confirm the meeting time) Tutor: Mr. Anthony Wong (aswwong@hku.hk) Mr. Jeff Luo (u3558653@connect.hku.hk) Pre-requisites: MSBA7004 Operations Analytics Co-requisites: N/A Mutually exclusive: N/A Course Website: Moodle Other important details: NA
COURSE DESCRIPTION
The course is designed to prepare you to apply business strategies, analytical methodologies and information technology in supply chain management. Traditionally industries have focussed on operation evaluation and performance improvement of mainly the manufacturing process; however, the deficiency of supply chain coordination results in severe downgrade of business competitiveness. With advent of information technology, computers not only improve manufacturing operation and management but also strategic decision-making as well. This course focuses on the systems approach to the planning, analysis, design, development, and evaluation of supply chain and logistics management. You will not be learning dry, abstract concepts or theories, but will be given practical situations and case studies from a number of industries to stimulate your thinking for solutions in the analysis of your own organisation's supply chain operation. The learning contents are designed to be comprehensive and illuminative. If you are merely a consumer or customer, this study will help make you more perceptive and more understanding of the constraints and strengths of supply chain management.
COURSE OBJECTIVES
1. Introduce principles and approaches to enhance knowledge and experience of management decision-making in business logistics. 2. Study modern technology to reduce cost and improve service in supply chain management. 3. Carry out project and research on information technology, operation management, and business strategy for supply chain management in manufacturing and service industries.
Programme Learning Outcomes
PLO1: Acquisition and internalization of knowledge of the programme discipline PLO2: Application and integration of knowledge PLO3: Inculcating professionalism and leadership PLO4: Developing global outlook

PLO5: Mastering communication skills			
COURSE LEARNING OUTCOMES			
Course Learning Outcomes		Aligned Programme Learning Outcomes	
CLO1: Develop knowledge of principles, concepts, and methods in the management of supply chain from a systems perspective.		CLO1 - PLO 1, PLO4	
CLO2: Develop capabilities for understanding, assessing, and resolving human, technical, and administrative issues for supply chain management.		CLO2 - PLO 1, PLO2	
CLO3: Develop managerial leadership and competency in managing a supply chain.		CLO3 - PLO1, PLO2, PLO 3, PLO4	
CLO4: Develop capabilities for case study and analysis of contemporary supply chain management.		CLO4 - PLO2, PLO4, PLO5	
COURSE TEACHING AND LEARNING ACTIVITIES			
Course Teaching and Learning Activities		Expected contact hour	Study Load (% of study)
T&L1 - Lectures and In-class discussions: basic concepts and knowledge will be presented in the class through; students express and share their ideas and questions on the case or articles related to supply chain management in the class.		36	30
T&L2 - Assignment and Case study: These assignments encourage students to think about the class materials after class.		24	20
T&L3 - Small group meeting and discussion: multiple discussion sessions with individual small group during the semester to provide the feedback and suggestions for course project and case study.		24	20
T&L4 - Self-study		36	30
Total		120	100%
Assessment Methods	Brief Description (Optional)	Weight	Aligned Course Learning Outcomes
A1. Class participation and class discussion	A1 - Participation in class to discuss a specific topic for clarifying understanding of the concept, case study of analysis and syntheses of current issues of SCM.	30%	CLO1, CLO2, CLO3
A2. Written assignments	A2 - Homework to explain the basic concepts and to apply the principle of supply chain management. The students accomplish tasks using technologies covered in class. Through the assignments they can acquire hands-on experience using these technologies.	30%	CLO1, CLO2, CLO4

A3. Group project & presentation	A3 - Project to do analysis and synthesis of the chosen current issues of the study field	40%	CLO2, CLO2, CLO3, CLO4
	Total	100%	

STANDARDS FOR ASSESSMENT

Course Grade Descriptors

A+, A, A-	Candidate has consistently demonstrated a thorough grasp of the subject as evidenced by original or exceptionally astute analysis and synthesis of supply chain management.
B+, B, B-	Candidate frequently demonstrated a substantial grasp of the subject supply chain management.
C+, C, C-	Candidate demonstrated some of the responses are well organized, clear but with insufficient elaboration.
D+, D	Candidate demonstrated solutions to questions and problems containing unstructured but relevant observations, and marginally interesting.
F	Candidate demonstrated little evidence of basic familiarity with the subject of supply chain management.

Assessment Rubrics for Each Assessment (Please provide us the details in a separate file if the space here is not enough)

Grade	Course Grade Descriptor
Assessment Task: Written Assignment	
A+, A, A-	Achieve a standard of excellent performance in the assignment with very accurate computation and very good analytical and problem solving skills
B+, B, B-	Achieve a standard of good performance in the assignment with accurate computation and good analytical and problem solving skills.
C+, C, C-	Master a standard of acceptable performance in the assignment with reasonable accuracy in computation and acceptable analytical and problem solving skills.
D+, D	Demonstrate a standard of marginally acceptable performance in the assignment with some errors in computation.
F	Fail to meet a minimum standard of passing the assignment with major errors in computation, inadequate analytical and problem solving skills.
Assessment Task: Class Participation and Cases Discussion	
A+, A, A-	Consistently and actively contribute to the class discussions and activities by providing relevant and helpful examples and analysis, identifying important issues, proposing creative and insightful solutions, raising thoughtful questions, synthesizing information obtained from readings and discussions and appropriately challenging assumptions and perspectives.
B+, B, B-	Actively contribute to the case discussions and activities by providing relevant and helpful examples and analysis, identifying important issues, proposing creative and insightful solutions, raising some thoughtful questions, occasionally synthesizing information obtained from readings and discussions and appropriately challenging assumptions and perspectives.
C+, C, C-	Contribute to the case discussions and activities by providing relevant and helpful examples and analysis, identifying important issues, proposing creative and insightful solutions, raising thoughtful questions, synthesizing information obtained from readings and discussions, appropriately challenging assumptions and perspectives.

D+, D	Contribute to the case discussions and activities by providing limited relevant and helpful examples and analyses, identifying some issues, proposing creative and insightful solutions and raising thoughtful questions.
F	Do not contribute or make very few contributions to the class discussions and activities. Tend to provide only irrelevant examples and analysis, and to propose inappropriate solutions. Ideas shared are often unrelated to the topic being discussed.
Assessment Task: Group Project Presentation	
A+, A, A-	– The presentation is excellent and well organized, clear and fluent, with smooth progression of ideas, effective use of presentation aids, and appropriate length, pace and tone. – The presentation group skillfully engages the audience and demonstrates a consistently high level of creativity, confidence, enthusiasm and capability in handling Q&A.
B+, B, B-	– The presentation is well organized and coherent, making generally effective use of presentation aids. It is of an appropriate length, pace and tone. – The presentation group is generally able to engage the audience and demonstrates a consistently high level of creativity, confidence, enthusiasm and capability in handling Q&A.
C+, C, C-	– The presentation is organized, moderately clear and fluent, with appropriate use of presentation aids. It is more or less of an appropriate length, pace and tone. – The presentation group attempts to engage the audience and show a moderate level of creativity, confidence, enthusiasm and capability in handling Q&A.
D+, D	– The presentation shows adequate effort to engage the audience, and demonstrates creativity, confidence, enthusiasm and capability in handling Q&A.
F	– The presentation is poor and not well-organized, unclear and not fluent with smooth progression of ideas, ineffective use of presentation aids, and inappropriate length, pace and tone. – The presentation group makes little effort to engage the audience and demonstrate very low level of creativity, confidence, enthusiasm and capability in handling Q&A.
Assessment Task: Group Project Report	
A+, A, A-	– Presentation of content is organized, thorough, precise, articulated with clarity and fluency, and consistent with the analysis and recommendations followed. – The analysis is insightful, critical, thorough, systematic, consistent, sufficiently supported by relevant and helpful fact/data, and effective application of appropriate concepts / techniques / examples, which are nicely integrated to the analysis. – The overall assessment demonstrates a profound understanding of the company's current situation and generates insightful overall findings by professionally synthesizing across both internal and external assessment. – Identify key issues for the application of supply chain management – All or almost all relevant issues of the application of supply chain management are clearly and accurately identified from various perspectives. Highly relevant evidence/fact is provided to support the argument. – The gap between the expected outcome and current situation can be identified and justified with sufficient evidence. The overall analysis is insightful, critical, thorough, systematic and consistent. – The recommendations are creative, practical, systematic, logical and aligned with the assessment and proposed changes. – The implementation plan is creative, practical, logical, well organized and justified with sufficient evidence. The plan can align with the company's needs and circumstances. – The report effectively arouses and maintains the reader's interest. It is well organized, with clear coherence and smooth progression of ideas, articulated with clarity and fluency. It is of an appropriate length and tone, including proper and consistent referencing and citations without errors.
B+, B, B-	– Presentation of content is organized, thorough, precise, articulated with clarity and fluency, and consistent with the analysis and recommendations followed.

	– The analysis is insightful, critical, thorough, systematic and consistent. It is sufficiently supported by relevant and helpful fact/data, and effectively applies appropriate concepts / techniques /examples, which are nicely integrated to the analysis. – The overall assessment demonstrates a profound understanding of the company's current situation and generates insightful overall findings. – All or almost all key issues of the application of supply chain management are clearly and accurately identified from various perspectives. Highly relevant evidence/fact is provided to support the argument. – The gap between the expected outcome and current situation is identified and justified with sufficient evidence. The overall analysis is insightful, critical, thorough, systematic and consistent. – The recommendations are creative, practical, systematic, logical and aligned with the assessment and proposed changes. – The implementation plan is creative, practical, logical, well organized and justified with sufficient evidence. The plan is aligned with the company's needs and circumstances. – The report effectively arouses and maintains the interest of the reader. It is well organized with clear coherence and smooth progression of ideas, articulated with clarity and fluency. It is of an appropriate length and tone, including proper and consistent referencing and citations without errors.
C+, C, C-	– Presentation of content is reasonably organized, thorough, precise, articulated with clarity and fluency, and consistent with the analysis and recommendations followed. – The analysis is systematic, consistent, with some supports of fact/data, and moderate effective application of appropriate concepts / techniques /examples which are moderately integrated to the analysis. – The overall assessment demonstrates some understanding of the company's current situation and generates sufficient overall findings. – Some key issues of the application of supply chain management are clearly and accurately identified from various perspectives. Highly relevant evidence/fact is provided to support the argument. – The gap between the expected outcome and current situation is identified and justified with limited evidence. The overall analysis is systematic and consistent. – The recommendations are systematic and moderately aligned with the assessment and proposed changes. – The implementation plan is moderately consistent and useful. The plan is moderately well aligned with the company's needs and circumstances. – The report is reasonably successful in arousing and maintaining the reader's interest. It is of an appropriate length and tone, including proper and consistent referencing and citations without errors.
D+, D	– Presentation of content is adequately organized, thorough, precise, articulated with clarity and fluency, and consistent with the analysis and recommendations followed. – The analysis is systematic, consistent, with some supports of fact/data, and adequate effective application of appropriate concepts / techniques /examples which are adequately integrated with the analysis. The overall assessment demonstrates limited understanding of the company's current situation and generates some findings. – Few key issues of the application of supply chain management are clearly and accurately identified from various perspectives. Limited evidence/fact is provided to support the argument. – The gap between the expected outcome and current situation is not fully identified and it is justified with limited evidence. The overall analysis is consistent. – The recommendations are of limited value to align with the assessment and proposed changes. – The implementation plan is moderately consistent and useful with some evidence. – The report is moderately skillful at arousing and maintaining the interest of the reader. It is of an appropriate length and tone, including proper and consistent referencing and citations without errors.
F	– Presentation of content is not well organized, unclear and not fluent. It is inconsistent with the analysis and recommendations followed. – The analysis is unsystematic, inconsistent, and insufficiently supported by facts/data. There is ineffective application of appropriate concepts / techniques /examples. The

	overall assessment demonstrates poor understanding of the company's current situation and generates poor findings. – Very few of the key issues of the application of supply chain management are clearly and accurately identified from various perspectives. Limited evidence/fact is provided to support the argument. – The gap between the expected outcome and current situation is poorly identified and justified with evidence. The overall analysis is poor and inconsistent. – The recommendations are poor and inconsistent, and they are not aligned with the company's needs and circumstances. – The implementation plan is inconsistent and not useful, supported by limited evidence. The plan cannot help to align with the organizational business strategy and acquire competitive advantage. – The report is not skillful at arousing and maintaining the reader's interest. It is of an inappropriate length and tone, showing improper and inconsistent referencing and citations with errors.

COURSE CONTENT AND TENTATIVE TEACHING SCHEDULE

(The schedule is subject to change)

Lecture		Subject	Supplement / Reference	Remark
1	03/19	Introduction to SCM ▪ What is SCM? ▪ Why SCM? ▪ The Challenges of SCM	• Case – Publishing Supply Chain • Preliminary – Supply Chain Analytics	
2	03/23	Designing Supply Chain Network ▪ Designing Distribution Networks ▪ Data Collection & Modeling ▪ Network Design in a Supply Chain	• Preliminary – Tools of optimization, simulation, and data visualization	• Project/Case Grouping • Case Assignment
3	03/30	Planning and Managing Inventories • Inventory Management • Managing Uncertainty • Supply Contract	• Example – Swimsuit Production	
4	04/02	Coordination and Distribution ▪ The Bullwhip Effect ▪ Method for Coping with Bullwhip Effect ▪ Distributed Strategies	▪ Case – GOME Electrical Appliances Holding Limited: The Group Purchasing Challenge ▪ Example – Zappos.com	
5	04/06	Supply Chain Integration • Centralized vs. Decentralized Control ▪ Push vs. Pull Systems ▪ Impact of the Internet on SC Strategy	▪ Case – UNIQLO: A Supply Chain Going Global • Example – Dell	
6	04/09	Strategic Alliances ▪ 3rd/4th Party Logistics (3PL/4PL) ▪ Retailer-Supplier Partnerships ▪ Distributor Integration	• Case – Polo Ralph Lauren & Luen Thai: Using Collaborative Supply Chain Integration in the Apparel Value Chain • Case – PGL: The Entrepreneur in China's Logistics Industry • Preliminary – Cold Chain	
7	04/13	Procurement /Outsourcing Strategies ▪ Buy-Make Decision ▪ e-Procurement ▪ Procurement Strategy	• Case – Aviation Spare Parts Supply Chain Management Optimization at Cathay Pacific Airways Limited • Case – Shanghai General Hospital: Rethinking its Medical Supply Chain • Example – HP	
8	04/16	Product and Supply Chain Design ▪ Design for Logistics ▪ Mass Customization ▪ Customer Value	• Case – TAL Apparel Limited: Stepping Up the Value Chain • Case – HKTVexpress: HKTVmall's Attempt in the Q-Commerce Era • Example – Nike	Homework (Due: 05/03)
9	04/20	Information Technology for SCM	• Case – Can Blockchain Help Château Lafite Fight Counterfeits	

		- Standardization - Integration - Adoption & Impact	- Case –Zuellig Pharma: Leveraging Blockchain to Overcome Supply Chain Challenges - Case – 3D Printing: Impacts on Supply Chain - Example – Bar Code / RFID / IoT / ERP / Drone	
10	04/23	<i>New Development and Challenges</i> - Green Supply Chain & ESG - Supply Chain Risk - Supply Chain Strategy Evolution	- Case – Cainiao’s Sustainable Packaging Challenges - Case – iPhone’s Supply Chain under Threat - Case – Cathay Pacific: Balancing Inherent Risks and ESG Concerns - Case – De Beers: Building on “Building Forever” - Example – Ozempic / Pop Mart - Preliminary – Partnership and Supply Chain Risks	
	04/27	<i>Project Presentation Course Wrap-up</i>		Project Report (Due: 05/03)

REQUIRED/RECOMMENDED READINGS & ONLINE MATERIALS (e.g. journals, textbooks, website addresses etc.)

Text: No textbook is required
Other Materials: Teaching notes, cases, and relevant articles

MEANS/PROCESSES FOR STUDENT FEEDBACK ON COURSE

- conducting mid-term survey in additional to SETL around the end of the semester
- Online response via Moodle site
- Others: _____ (please specify)

COURSE POLICY (e.g. plagiarism, academic honesty, attendance, etc.)

Professionalism: You are expected to behave with the professionalism you would bring to the workplace. Behavior that would not be appropriate in a marketing team meeting at work is probably not appropriate for class either. Also, you are expected to approach the class with the goal of actively maximizing both your learning and the learning of your classmates.

Attendance: Attendance is a necessary but not sufficient condition for participation. If you do not actively participate, you will receive a low participation grade even if you attend every class.

Participation: The basis for class participation is quality, not quantity. While lively debate is encouraged, please make sure your comments are constructive and on-topic.

Course Policies on Academic Dishonesty:

We are serious in students’ ethical conducts. The University Regulations on academic dishonesty will be strictly enforced.

- We do not tolerate students engaging in academic dishonesty which includes, but is not necessarily limited to, the following types: plagiarism, paraphrasing of someone else's ideas, unauthorized collaboration on out-of-class projects, cheating on in-class exams, and unauthorized advance access to an exam.
- Students are expected to be aware of what plagiarism is and how to avoid it. Please refer to the HKU Policies on Plagiarism.
- Students should also be familiar with the HKU regulations and policies particularly on attendance, absence, examination, and copyright. Please refer to the HKU Undergraduate Student Handbook and HKU Examination Unit webpage.

Note: Use of Artificial Intelligence (AI) Tools in Assessments

- Students may utilize generative AI tools, such as ChatGPT, for tasks like checking grammar and improving writing. However, all AI-generated content must be carefully reviewed and revised

by the student before submission. While AI tools can be helpful, they are susceptible to factual inaccuracies, improper referencing, and misunderstandings. Therefore, students are responsible for thoroughly verifying any AI-produced content and citing relevant sentences appropriately.

- Submitting AI-generated text without integrating the student's own ideas will result in significant grade deductions. Moreover, directly copying AI outputs and presenting them as one's own work constitutes academic dishonesty. It is the student's responsibility to ensure that any use of AI complies with the institution's standards of academic integrity. When paraphrasing, quoting, or incorporating content – whether text, images, data, or other formats - created by AI tools, students must acknowledge and cite the source accordingly. Students should read in detail the " Policy on Use of Generative Artificial Intelligence for Teaching and Learning" (https://intraweb.hku.hk/reserved_1/tlearn/genai/gaitf-policy-dissemination-202309.pdf)
- When submitting individual or group assignments and reports, students are required to include a declaration of Generative AI usage. If there is any uncertainty regarding appropriate AI use, students are encouraged to consult with the course lecturer for clarification.

ADDITIONAL COURSE INFORMATION (e.g. e-learning platforms & materials, penalty for late assignments, etc.)
