COURSE DESCRIPTION

Consumers leave a massive digital trail through mobile devices, social media, transactions, and information communication technologies (ICT). Companies and organizations in all industries face this plethora of consumer data and are looking to turn it into value through advertising and better products and services. This course looks to introduce students to the various methods and strategies to make sense of the data. We will cover topics including advance and Big Data predictive analytics, machine and deep learning, text mining and analysis, image and video analysis, social networks and geospatial and mobility analytics.

Students will have real hands-on practice exercises with these methods, learn how to generate insights from large and unstructured data, and build an understanding of its strategic relevance in creating sustainable competitive advantage. *No programming nor coding experiences are required*. We will be using data cases from the HKU Asia Case Research Center. These data cases will give access to the Data Analytics Platform (DAP), an exclusive, web-based platform to do advance analytics without installing any software or packages on their computer. The DAP will be using Orange Data Mining, an easy-to-use visual tool for data analysis which requires no programming experience.

The course will also bridge these technical methods with social sciences and consumer behavior. We will cover several case studies from the professors research, with an emphasis on Asia, in sundry industries including retailing and e-commerce, advertising, FinTech and retail financial sectors, telecommunication, and transportation and smart nations.

Finally, we will touch upon the interwoven dependencies on the legal frameworks with Big Data, including issues relating to privacy, regulations, rights, consumer reactions and adherence to data legislation in different markets.

The course aims to prepare students for managerial roles in companies across a spectrum of industries. Students will gain valuable insights into big data capacities, its limitations, and key strategies.

COURSE OBJECTIVES

1. To gain exposure to Big Data methods for Big Data predictive analytics, text mining, image & video analysis, and spatial and mobility analytics.
2. To build an understanding the of the business value of Big Data analytics
3. To understand how Big Data can be used to better understand customer behavior
4. To gain an appreciation of how customer analytics can apply to various industries
5. To build fundamentals on marketing analytics and customer relationship management (CRM) analytics

PROGRAMME LEARNING OUTCOMES

PLO1: Acquisition and internalization of knowledge of the programme discipline
PLO2: Application and integration of knowledge
PLO3: Inculcating professionalism and leadership
PLO4: Developing Global Outlook
PLO5: Mastering communication skills

COURSE LEARNING OUTCOMES

Course Learning Outcomes	Aligned Programme Learning Outcomes

CLO1: Understand how to use different Big Data methods and tools for real-world problems to understand consumer behaviour	PLO2,5
CLO2: Create sustainable competitive strategies using Big Data	PLO1,2,3,4,5
CLO3: Understand the data landscape from the consumer, legal, and regulatory framework	PLO 2,3,4
CLO4: Learn about business cases which leverage Big Data-centric strategies	PLO2,3,4,5
CLO5: Explain how Big Data helps to build insights into social sciences, consumer behaviour, and economics.	PLO1,2,3,5

COURSE TEACHING AND LEARNING ACTIVITIES

Course Teaching and Learning Activities	**Expected contact hour**	**Aligned Course Learning Outcomes**
T&L1. Interactive Lectures & Case discussions	30	CLO1,2,3,4,5
T&L2. Case reading & preparation	25	CLO2,4,5
T&L3. Textbook and course reading material	25	CLO1,2,4,5
T&L4. Exercises	40	CLO1,5
Total	**120**	

COURSE ASSESSMENT METHODS

Assessment Methods	**Brief Description (Optional)**	**Weight**	**Aligned Course Learning Outcomes**
A1. In-class participation	Discussion and interactions during lectures	30	CLO1,2,3,4,5
A2.Case discussion	In-class discussion of cases. Prepare for cold-calls	40	CLO2,3,4,5
A3.Exercises	Submit written at-home exercises and assignments.	30	CLO1,5
Total		**100%**	

STANDARDS FOR ASSESSMENT

Course Grade Descriptors

A+, A, A-	Consistently demonstrate a thorough grasp of the subject as evidenced by achieving an outstanding performance in understanding of marketing principles and concepts, critical analysis and synthesis, application of knowledge, formulation of marketing solutions, written and verbal communication and teamwork skills.
B+, B, B-	Frequently demonstrate a substantial grasp of the subject as evidenced by achieving a proficient performance in understanding of marketing principles and concepts, critical analysis and evaluation, application of knowledge, formulation of marketing solutions, written and verbal communication and teamwork skills.
C+, C, C-	Occasionally demonstrate a general grasp of the subject as evidenced by achieving a moderate performance in understanding of marketing principles and concepts, analysis and evaluation, application of knowledge, formulation of marketing solutions, written and verbal communication and teamwork skills.
D+, D	Demonstrate a partial grasp of the subject as evidenced by achieving an adequate performance in understanding of marketing principles and concepts, analysis and

	evaluation, application of knowledge, formulation of marketing solutions, written and verbal communication and teamwork skills.
F	Demonstrate a poor grasp of the subject as evidenced by achieving a poor performance in understanding of marketing principles and concepts, analysis and evaluation, application of knowledge, formulation of marketing solutions, written and verbal communication and teamwork skills.

Assessment Rubrics for Each Assessment

A1. In-class participation (30%) & A2. Case discussion (30%)

A+, A, A-	B+, B, B-	C+, C, C-	D+, D	F
Extremely well prepared for class discussion, active in sharing views and attended at least 90% of classes.	Partially prepared for class discussion, quite active in sharing views and attended at least 80% of classes.	Not well prepared for class discussion, limited active in sharing views and attended at least 80% of classes.	Not well prepared for class discussion, no sharing of views and attended at least 70% of classes.	Never prepared for class discussion and no sharing of views, experience, and attend less than 70% of classes.

A3. Exercises (40%)

A+, A, A-	B+, B, B-	C+, C, C-	D+, D	F
• Demonstrate a strong understanding of all relevant knowledge •Present arguments that have an element of originality •Achieve a standard of excellent performance in the assessments with very accurate computation and very good analytical and problem solving skills	•Demonstrate a good understanding of all relevant knowledge •Present arguments that go beyond the lecture and textbook •Achieve a standard of good performance in the assessments with accurate computation and good analytical and problem solving skills	•Demonstrate a basic understanding of the concepts involved •Present arguments in a well-structure manner •Meet a standard of acceptable performance in the assessments with reasonably accurate computation and acceptable analytical and problem solving skills	•Demonstrate a minimum understanding of the concepts involved •Present arguments in a marginally acceptable manner •Meet a standard of marginally acceptable performance in the assessments with some errors in computation and barely adequate analytical and problem solving skills	•Demonstrate a poor understanding of the concepts involved •Present arguments poorly •Fail to meet a standard of passing the assessments with major errors in computation and inadequate analytical and problem solving skills

COURSE CONTENT AND TENTATIVE TEACHING SCHEDULE

See attached schedule

REQUIRED/RECOMMENDED READINGS & ONLINE MATERIALS	
Recommended book – *Ghose, Anindya, "*Tap: Unlocking the Mobile Economy". MIT Press, 2017.	
MEANS/PROCESSES FOR STUDENT FEEDBACK ON COURSE	
The SFTL questionnaire	
COURSE POLICY
