COURSE DESCRIPTION

More than ever, corporations are engaging the larger community with policies and procedures in pursuit of corporate social responsibility (CSR) and environmental, social and corporate governance (ESG). What was once a differentiation strategy for niche marketers has become a central concern of the Fortune 500.

Research shows that 77% of consumers are motivated to purchase from companies committed to making the world a better place. (AFLAC, 2019) 95% of employees believe business must benefit all stakeholders, not just shareholders alone. 93% of employees today believe companies must lead with Purpose. 88% of employees believe it is no longer acceptable for companies just to make money; companies must positively impact society as well. (PorterNovelli, 2020)

This course provides students with an in-depth understanding of what CSR/ESG is, how to apply it effectively in a global context, and how to manage it well. Using a case-based approach studying pioneers such as The Body, Shop, Ben & Jerry's, and Patagonia, the course spotlights actual experiences of corporations that have used such strategies successfully – and unsuccessfully – to draw practical lessons for global managers. Further cases and recent news events will study how CSR/ESG is implemented by some of the largest brands in China and the world.

As discussed by Porter and Kramer (CSV - Creating Shared Value), companies should generate economic value in ways that promote social good. "Shared value is not social responsibility, philanthropy, or even sustainability, but a new way to achieve economic success." While they described the social benefits that companies could provide through their products and value chains and through economic development, this course will focus on brand activities and purpose-led marketing and the resulting effects on key stakeholders including customers, employees and communities.

Students will learn to define purpose and develop a plan to cultivate purpose in an organisation. They will analyse different models of social purpose and examine case studies to test assumptions and find the winning solutions for companies' investors, employees, and customers. By studying the criteria and standards of evidence developed to measure the true social impact of an organisation, they will identify the Sustainable Development Goals (SDGs) and Environmental Social and Governance Criteria (ESG) to be able to accurately assess an organisation's inputs, outputs, and impact. Students completing this course will have a clearly defined understanding of purpose in an organisation and how to contribute to successful implementation.

COURSE OBJECTIVES

1. To understand the principles and practices of Social Impact (both CSR and ESG);
2. To discover the core pillars of effective social impact marketing strategies;
3. To develop the essential skills for effective marketing and management of a purpose led strategy in an organisation;
4. To learn how to establish and monitor success metrics to constantly enhance your marketing function;

PROGRAMME LEARNING OUTCOMES

PLO1: Acquisition and internalization of knowledge of the programme discipline
PLO2: Application and integration of knowledge
PLO3: Inculcating professionalism and leadership
PLO4: Developing Global Outlook
PLO5: Mastering communication skills

COURSE LEARNING OUTCOMES

Course Learning Outcomes	**Aligned Programme Learning Outcomes**

CLO1: Explain and characterise the major concepts and framework of social impact marketing.	PLO1, PLO4
CLO2: Analyse the key drivers using data from observations, experiences and systematic research methods for successful social impact marketing programs	PLO1, PLO2
CLO3: Apply the concepts and tools from other related or unrelated fields to design an innovative social impact marketing program.	PLO1, PLO2, PLO3, PLO4
CLO4: Collaborate with other classmates with diversified expertise and experiences productively in the group work; communicate and present information effectively	PLO2, PLO4, PLO5

COURSE TEACHING AND LEARNING ACTIVITIES

The course will be delivered in a workshop mode via a blend of short lectures and interactive class discussions, case analyses, and active learning exercises. A group project will be used to help students assume the role of a consulting team and develop in-depth insights and practical experience on conducting a comprehensive and thorough investigation on a specific aspect of a company's social impact marketing practices.

T&L1. Interactive Class Lectures/Discussions

Interactive presentations with Powerpoint slides will be provided by the instructor to explain and illustrate key concepts. Students will be invited and encouraged to share their view and experience in class discussions. **(Targeted CLOs: CLO1, CLO2, and CLO3)**

T&L2. In-class Exercises

In-class exercises will be used to deepen students' learning and develop their application capability on specific topics. Students are expected to work in groups to address issues posted in these exercises and share their thoughts in class discussions. **(Targeted CLOs: CLO1, CLO2, CLO3, and CLO4)**

T&L3. Case Analysis and Discussion

Case analysis and discussion will be used to develop students' capacity to identify major issues/problems in diverse business settings, undertake systematic investigation to obtain relevant information, and apply social impact concepts and tools to make sound decisions. **(Targeted CLOs: CLO1, CLO2, CLO3, and CLO4)**

T&L4. Individual Assignment

The individual assignment is designed to help students gain hands-on experience in analysing social impact marketing practices and issues arising from them, developing implications from analysing these issues, and providing recommendations for improvement.

This paper is a well-researched paper that articulates a specific issue/topic within Sustainability Marketing (e.g. greenwashing, consumer scepticism, consumer behavior gaps, legal, regulatory, or ethical issues). **This assignment is not company or brand specific.** It aims to enhance skills in written corporate communication, particularly in crafting persuasive documents that can influence decision-making processes, similar to methods employed by leading companies like Amazon.

Format and Length: The position paper is limited to 2 printed pages (approximately 7-800 words - 1.5 line spacing in a 12-point font). References are excluded from the page count.

Structure: Begin with an introduction that clearly states the issue being addressed and outlines its significance in sustainability marketing and then provide the background, providing context and relevance to current practices (together around 200 words). Next, present your findings and analysis (approximately 300 words) to include research findings related to the issue and a critical analysis of these findings, supported by sources cited using the **Harvard in-text citation** method. Next, identify potential counterarguments/differing perspectives regarding the issue (about 100 words). Address these counterarguments with evidence or reasoning to strengthen your position. Conclude with compelling, actionable and practical recommendations for action based on your analysis (around 150 words).

Research Requirements: You must utilize at least three references to support your arguments (e.g. ideally scholarly references or reputable industry publications). Proper citation in Harvard style (in-text citations with reference list - in alphabetical order by author's surname).

Evaluation Criteria: Your submission will be evaluated on clarity and conciseness in communication, depth of analysis demonstrated through thorough research and critical thinking, logical structure and organization of ideas, effective use of evidence to support claims, and adherence to formatting guidelines including length and citation style. (See Rubric below) **(Targeted CLOs: CLO1, CLO2, and CLO3)**

T&L5. Group Project

The Group Project is designed to help students assume the role of a consulting team and develop in-depth insights and practical experience on conducting a comprehensive and thorough investigation of a company's social impact marketing practices. **(Targeted CLOs: CLO1, CLO2, CLO3, and CLO4)**

Students assume the role of a consulting team **(working for a company that the group selects)** to conduct an analysis of the sustainable marketing practices employed (or not) by the company. They will then develop in-depth recommendations based on the insights from their investigation. The output will be 1) an oral presentation of top

recommendations to the company's board (15 min presentation + 5 mins for Q&A with visual aids/PPT) and 2) a written document (Word/PPT) detailing the research, analysis and recommendations in depth. A peer evaluation of contribution will also factor into the final grade. (See Rubric Below)

Course Teaching and Learning Activities	**Expected contact hours**	**Aligned Course Learning Outcomes**
T&L1. Interactive Class Lectures/Discussions	30	CLO1, CLO2, & CLO3
T&L2. In-class Exercises	25	CLO1, CLO2, CLO3, & CLO4
T&L3. Case Analysis and Discussion	15	CLO1, CLO2, CLO3, & CLO4
T&L4. Individual Assignment	50	CLO1, CLO2, & CLO3

COURSE ASSESSMENT METHODS

Students' course performance will be assessed by a combination of individual (50%) and group (50%) work. The table below presents the weighting for each assessment task and the alignment of assessment tasks with teaching and learning activities and course learning outcomes:

Assessment Methods	**Weight**	**Aligned Course Learning Outcomes**
A1. Class Participation	25%	CLO1, CLO2, CLO3, & CLO4
A2. Individual Assignment: Sustainability Marketing Practices Study	25%	CLO1, CLO2, & CLO3
A3. Group Project • Project Proposal (5%) • Project Presentation (20%) • Project Report (25%)	50%	CLO1, CLO2, CLO3, & CLO4
Total	**100%**	

STANDARDS FOR ASSESSMENT

Course Grade Descriptors

The following general grading rubrics will be used to assess students' overall course performance and performance in each of the above three assessment tasks.

A+, A, A-	Very good to excellent performance on most or all assessment tasks.
B+, B, B-	Good to very good performance on most or all assessment tasks.
C+, C, C-	Fair to good performance on most or all assessment tasks.
D+, D	Fair performance on most or all assessment tasks.
F	Poor performance on most or all assessment tasks.
