COURSE DESCRIPTION

Amid the rising challenges such as climate risks, social inequality, and governance crisis, corporate governance both contributes to these challenges and holds the potential to address them. Grounded in solid management theories and diverse case studies, our course provides intellectual tools to dissect how corporate governance shapes individuals and organizations in the market economy and how this affects sustainability. We then help students see how a managerial commitment to ESG can transform global corporations to be more sustainable, equitable, and responsibly governed.

COURSE OBJECTIVES

This course aims to examine how the management of individuals, organizations, and societies—particularly over recent decades – can contribute to a more sustainable economy. By drawing on a wide range of domestic and international case studies, students will gain practical insights into real - world management challenges and solutions. Through analyzing these examples, students will be inspired to develop innovative thinking and practical skills, positioning themselves as future analysts and leaders capable of devising novel management strategies for corporate sustainability.

COURSE POLICY (e.g. plagiarism, academic honesty, attendance, etc.)

Cheating or plagiarism of any kind would result in an automatic F grade for the course plus strict enforcement of all Faculty and/or University regulations regarding such behavior. Incident(s) of academic dishonesty will NOT be tolerated.

Academic dishonesty is a behavior in which a deliberately fraudulent misrepresentation is employed in an attempt to gain undeserved intellectual credit, either for oneself or for another. It includes, but is not necessarily limited to, the following types of cases:

a. Plagiarism - The representation of someone else's ideas as if they are one's own. Where the arguments, data, designs, etc., of someone else are being used in a paper, report, oral presentation, or similar academic project, this fact must be made explicitly clear by citing the appropriate references. The references must fully indicate the extent to which any parts of the project are not one's own work. Paraphrasing of someone else's ideas is still using someone else's ideas, and must be acknowledged.

b. Unauthorized Collaboration on Out-of-Class Projects - The representation of work as solely one's own when in fact it is the result of a joint effort.

ADDITIONAL COURSE INFORMATION (e.g. e-learning platforms & materials, penalty for late assignments, etc.)
